SUBJECT: Labeling of genetically modified food.

[Message]

Dear President Clinton,

I just wanted to voice my opinion on the need for labeling of genetically modified foods. Because of the potential health risks due to toxins and allergens being introduced into foods, it is in everyones best interest to know what they are consuming. Please consider the interests of the consumer, not just the interest of those who stand to make a profit.

In many cases genetic engineering can be beneficial, however, the long term effects are unknown and it should be everyones right to make the choice of whether or not they want to consume these potentially harmful food products.
